Officer of Cleveland Automobile Company Caught Taking Securities.

CLEVELAND, Nov. 25.—Police today were holding an officer of a prominent Cleveland automobile distributing company and \$21,000 in negotiable stocks, which detectives declare they saw the man take from the office safe of the company. Associates of the man declared that they would not prosecute him.

The man was held on a technical charge of investigation. The police refused to reveal the names of the parties concerned. Officers of the firm acted on a tip. When the man drove up and entered the company's offices yesterday detectives were stationed at points of vantage. According to the detectives they arrested the man when they saw him open the safe and take the securities. Two witnesses found in his automobile, the authorities say, indicate that the man was prepared to take a long journey.

"We don't want prosecution," the president of the concern is quoted as having told the police. "Bringing charges against this man would only make him a criminal. We knew of the unfortunate mistake he has made and we're going to try to help him get back on his feet instead of prosecuting him and pushing him down. No harm has been done."

## TEXTILE STRIKE IN NEW ENGLAND ENDS

BOSTON, Nov. 27.—The return to work today of as many of the operatives of the Amoskeag

Manufacturing Co. in Manchester, N. H., as could be accommodated marked the virtual end of the great textile strike in New England. The Amoskeag unions called off their strike yesterday. Starting in Rhode Island in January, the strike a month later had spread to all parts of Massachusetts and New Hampshire, affecting mills in all the leading textile centers except Fall River and New Bedford. In some places it was called as a protest against a wage reduction averaging 20 per cent and others against an extension of working hours from forty-eight to fifty-four a week, and in still others, including Manchester, against a combined wage reduction and lengthening of the working week.
